Clean Air in the Classroom: Improve Air Quality and Extend HVAC and Equipment Life Through Preventive Maintenance

This 1-hour training on indoor air quality (IAQ) in schools—

- Explained the benefits of improving performance of heating, ventilation and air conditioning (HVAC) systems and other building equipment using predictive, preventive and planned IAQ maintenance.
- Prepared participants to develop and implement a tailored plan for integrating preventive maintenance and IAQ management strategies to save money, increase energy efficiency, improve reliability and protect health.
- Demonstrated how to replicate the best practices of a school district mentor to identify and implement HVAC and equipment efficiency strategies as part of an effective IAQ preventive maintenance program.

Presented by the U.S. Environmental Protection Agency Indoor Environments Division
