All In for IAQ Preventive Maintenance: Key Strategies for Training Staff and Communicating Success

This 1-hour training on indoor air quality (IAQ) in schools—

- Explained how to train staff and build a capable, committed team to integrate preventive maintenance and IAQ management strategies that maintain optimal learning environments, save money and protect health.
- Highlighted proven practices to design, run and monitor an effective preventive maintenance plan, including a Facility Assessment Survey, Building System Checklist and Computerized Maintenance Management System (CMMS).
- Prepared participants to facilitate effective communication between departments to raise awareness of the importance of IAQ preventive maintenance, improve efficiency and increase buy-in and support.
- Demonstrated how to replicate the best practices of school district directors, administrators and other leaders to implement communications and team training strategies as part of a sustainable IAQ preventive maintenance program.

Presented by the U.S. Environmental Protection Agency Indoor Environments Division
