Indoor Air Quality Plus Energy Efficiency: A Formula for Saving Money While Protecting Health

This 1 hour training:

- Explained the critical connection between IAQ and energy efficiency and the importance of properly integrating the two for optimal occupant health and performance.
- Detailed policies and procedures that facility managers need to understand to effectively protect IAQ while increasing energy efficiency, preparing participants to take a proactive approach to saving energy and money.
- Demonstrated best practices to integrate IAQ and energy efficiency into building operations and maintenance activities, including facility design, construction and renovation.
- Identified resources to help with energy efficiency efforts, including EPA's guide, *Energy Savings Plus Health: Indoor Air Quality Guidelines for School Building Upgrades* and ENERGY STAR® tools.
- Provided examples from a successful model school district that implemented energy efficiency measures while maintaining occupant health.

Presented by the School Health and Indoor Environments Leadership Development (SHIELD) Network
